Achieving energy targets

**The new
generation
of windows!**

KBE 76 Double seal system AluClip Pro

Window and door system

KBE 76 Double seal system AluClip Pro

KBE 76 AluClip Pro is the miracle energy saver with a beautiful, easy care aluminium surface. The AluClip Pro has an aluminium profile connected to a plastic profile

What AluClip Pro does

The aluminium performs the static function so no steel reinforcement is necessary inside the window sash.

Strong combination: aluminium & plastic

With KBE76, you get both: aluminium and plastic in one innovative system. You therefore also get the advantages of both materials.

Aluminium is elegant, highly weather proof, extremely stable and available in a wide range of colours. Plastic provides optimum heat and sound insulation, plus high functional reliability.

KBE 76 window with 76 mm construction depth

» Top stability

Intelligent combination of aluminium facing shell and plastic profile enhances static stability.

» Top heat insulation

Extraordinary heat insulation compared with aluminium windows.

» Top design

Aluminium look outside with neutral white inside. Unlimited colour options through various coating methods and numerous RAL colours.

» Top value for money

Easy-care, durable and robust.
